

Pivot Using Specific Heat to Identify a Substance

Purpose: To use a specific heat measurement to identify a substance.

Open the Pivot Interactives exercise “Using Specific Heat to Identify a Substance”. Determine the specific heat of the substances in the six trials in the video in Part 1. Then identify the substance by referring to the table of specific heats in item number 4 of Part 1.

Describe how you determined the substances for the six trials in a Word file. Then submit a pdf of your Word file via Canvas.
